Dear Rhino Owner:

Your Rhino side-by-side vehicle was designed to be a very capable off-road vehicle with a wide variety of potential uses.

Regardless of how you use your Rhino, please remember that both the driver and passenger must always buckle the seat belt when riding in the vehicle. Also the driver and passenger must wear an approved off-road motorcycle-type helmet that fits properly.

As with any off-road-capable vehicle, there is a risk of tip over or rollover under certain conditions. Uneven terrain or slopes which pitch the vehicle sideways, turning too fast or sharp, or a combination of conditions increase the risk of tip over.

As your Owner's Manual describes, "If the vehicle starts to tip, gradually steer in the downhill direction if there are no obstacles in your path. As you regain proper balance, gradually steer again in the direction you want to go."

However, if you are in a situation where the vehicle is tipping over, do not put your arm or leg outside the vehicle to try to stop it. You could be severely injured. You could suffer a crushed hand, arm, leg, or foot, if part of your body is caught underneath the vehicle. You must keep your arms and legs inside the vehicle until it has stopped moving.

To help remind you and other operators or passengers in your Rhino of this important information, Yamaha has prepared new warning labels, one for each side of the enclosure. We recommend you install these labels on your Rhino or have your authorized Yamaha dealer install them for you. An illustration showing proper location is provided on the back of this letter.

We are concerned about your safety and continued satisfaction with our products. Thank you for giving your attention to this important matter.

Sincerely,  
Customer Support Group  
Yamaha Motor Corporation, U.S.A.
